- retains Frost appearance after shaping and forming.
- ideal for free standing, double - sided display units, shelving and brand promotions.

Mitchell Plastics

TECHNICAL INFORMATION:

- The surface finish is largely unaffected during the thermoforming process, except possibly at extreme levels of thermoforming draw ratios.
- During line bending, little change will be visible, however, if the sheet is too cold, distortions in the middle of the line bend may occur.
- A variety of films can be applied to the surface of Perspex™ Frost to produce logos or display features.
- Can be glued, similar to standard Perspex™ materials.
- Has the same UK and European food contact approvals as Perspex™ cast sheet.
- Used in glazing and for balustrades across Europe.

OTHER MITCHELL PLASTICS PRODUCTS:

- **Edge Lite** - Ultra-flat edge lighting system featuring Perspex™ Lux
- **Super Abrasion Resistant (SAR)** - An acrylic sheet which provides scratch resistance not dissimilar to glass.
- **Perspex™ Lux** - An edge lit acrylic sheet.
- **V.E. Perspex™** - Ultra Violet absorbing acrylic sheet.
- **Impact Modified** - 6 times the impact strength of standard cast acrylic sheet.
- **Perspex™ Clearview** - Noise barrier systems.
- **'AliFrost' Doors** - Ultra modern, aluminium framed door complete with Perspex™ Frost colour or clear insert.
