PERSPEX™ PEARLESCENT, A LUSTROUS NEW MOOD

An entirely new product, Perspex Pearlescent, has been specially created to offer an attractive new effect to designers and specifiers – whether in the world of POS (point of sale), display and visual communications, or in other areas of design, such as furniture and interiors.

Formulated to provide a range of products all with a softly shimmering lustre – Perspex Pearlescent has been launched in five exciting colour options to offer even more choice in today's contemporary retail environment.

Pearl, a light natural opal, *Azure* a cool and delicate blue and *Candy* a soft and subtle pink, take these otherwise simple colours and use light and shade to create a totally new and fascinating visual effect. *Platinum*, a steely, almost metallic grey and *Caramel Gold* with its rich warm golden glow, add a completely new dimension to the metallic look.

Together these form the new Perspex Pearlescent range – adding an exciting new look and appearance to the already proven performance properties for which Perspex has become renowned. Perspex Pearlescent can be easily fabricated using the same cutting, routing and joining techniques as with standard Perspex, to give designers and fabricators the optimum in creative versatility.

And because the lustre in Perspex Pearlescent has an inviting, almost luminous effect, you can even achieve exciting and unusual variations when bending or thermoforming the material.

The lustre in Perspex Pearlescent can be even further enhanced by subtle changes in its appearance depending on the light source and direction – so that virtually every POS display item crafted from Perspex Pearlescent could be considered almost unique!

NEW ANTIQUE, COPPER AND GRAPHITE
COLOURS NOW AVAILABLE

PERSPEX™ PEARLESCENT Product range and colour options

Sheet size: 3050 x 2030mm
Sheet thickness: 3mm
