

Perspex® Cast Acrylic Sheet Glass Look

Available in a wide range of surface finishes and thicknesses from 3 – 10mm

This special grade of Perspex® was developed to provide a “glass look” product to offer designers all of the benefits of cast acrylic, whilst giving the appearance of glass. It provides the perfect choice in today’s modern displays where clean lines and minimal appearance are required.

With half the weight of glass and five times the impact strength of traditional float glass, Perspex® 6T21 Glass-Look is the ideal alternative – it gives greater design flexibility and can be easily machined, fabricated and installed.

Perspex® Glass-Look is available in a wide range of thicknesses and finishes, including gloss, Frost and Impressions Linear.
