## Perspex<sup>®</sup> Cast Acrylic Sheet S-Lux & D-Lux

Available in 10mm

Specifically designed to give optimum performance in terms of even light distribution and superb brightness, our patented edge-lit light technology: Perspex<sup>®</sup> S-Lux and D-Lux does just that!

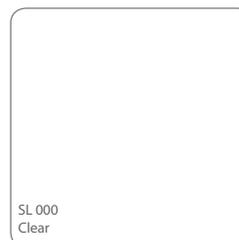

Perspex<sup>®</sup> S-Lux has a special textured finish on one side of the sheet, producing an even illumination across the surface. Perfect for anything from small signs to large poster boxes and Euro posters, it is a versatile product giving optimum edge lighting capability regardless of the size of your sign.

Perspex<sup>®</sup> D-Lux has the specially textured finish on both sides of the sheet developed specifically for edge-lit light-diffusing signs where you need to convey messages and graphics from multiple angles and directions. It offers the same superb light management properties as Perspex<sup>®</sup> S-Lux, but does it from both sides. Perspex<sup>®</sup> D-Lux is the ideal choice for small double sided poster boxes, and extra bright single sided sign boxes.

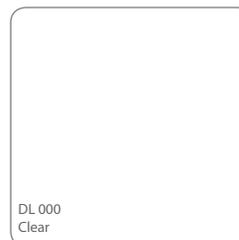

In addition Perspex<sup>®</sup> S-Lux, D-Lux and Prismex<sup>®</sup> offer all the product characteristics you have come to expect from Perspex<sup>®</sup>: outstanding weathering, light weight, easy to install and excellent durability.
