SUSTAINABILITY

Working sustainably is a key element of our strategy, design and the materials we have chosen. FENTE® range uses high quality, environmentally responsible materials including EchoPanel® and genuine PERSPEX®re.

EchoPanel® is an Australian made, PET product material made from 60-80% post consumer waste sourced from recycled PET bottles.
Its certified Global Green Tag rating and Low VOC Emissions make it ideal for commercial offices, schools and work places. The material is light weight and can be used in creative ways, such as a practical desk caddy.

PERSPEX® is the original high-quality acrylic material, known for being low VOC, non-toxic (lead-free), and food-contact rated (ROHS compliant).
It is 100% recyclable, with selected colours now available in fully recycled (100%) acrylic.
A key advantage of PERSPEX® lies in its extensive colour range, precisely matched with EchoPanel®. This includes solid colours, anti-fingerprint frosts, vibrant tints, and naturally glowing fluorescents—making it a popular choice across a wide variety of applications.
